퍼셉트론으로 XOR 문제 해결

$y = x_1w_1 + x_2w_2 + b$

x_1	x_2	y_1	y_2	y
0	0	1	0	1
1	0	1	1	1
0	1	1	0	1
1	1	1	0	1

입력 (0,0)

$y = x_1w_1 + x_2w_2 + b$

$0 \cdot 1 + 0 \cdot 1 - 1.5 = -1.5 < 0$

$y = 0$

if $b = -0.5$

$y = 0 \cdot 1 + 0 \cdot 1 - 0.5 = -0.5 < 0$

$y = 0$
